

## Quantifying vulnerability to natural hazards in changing climate patterns. New perspectives and methods

### Online Course Calendar, 2024

#### PRE-FIELD ONLINE COURSES

<b>Week 1</b> <i>October 3rd</i> 16:00 – 18:00 CET	Lecture: Anthropocene	Stefan Dorondel and Iuliana Armas (University of Bucharest)
<b>Week 2</b> <i>October 10th</i> 16:00 – 18:00 CET	Lecture: State of the climate	Alasdair Skelton (Stockholm University)
<b>Changing environmental scenarios and community vulnerability assessments</b>		
<b>Week 3</b> <i>October 17th</i> 16:00 – 18:00 CET	Lecture: Sea level changes – challenges to coastal areas and adaptation methods	Niki Evelpidou (EKPA) Anna Karkani (EKPA) Giannis Saitis (EKPA)
<b>Week 4</b> <i>October 24th</i> 16:00 – 18:40 CET	Lecture: Deciphering the climatic and tectonic signals in landscape evolution of active orogens	Marta Della Seta (Sapienza Università di Roma)
	Lecture: Changing geohazards in response to tectonic and climatic forcing	Marc-Henri Derron (Université de Lausanne)
<b>Week 5</b> <i>October 31st</i> 16:00 – 18:40 CET	Lecture: Dynamics of geohazards and disasters in fragile coupled landscapes under changing climate	Bamutaze Yazidhi (Makerere University, Uganda)
	Lecture: How to increase the resilience of landscapes and communities to climate change impacts	Jasper Knight (University of the Witwatersrand, South Africa)
