The Programme

Monies are among the objects of greatest importance for the understanding of multiple aspects in the study of social, political, and economic history but also of art, material culture and technology. This CIVIS blended intensive programme focuses especially on the material aspects of money such as the production and trade of mint metals.

Teaching Faculty

This BIP is organized as part of the Series “Heritage of Money and Coinage” for the third time jointly by teaching faculty from the departments of History and Archaeology at the Universities of Rome (Sapienza), Stockholm, Salzburg and Tübingen. Additionally Guest Lecturers from around the world are invited to teach at the virtual sessions.

Annalisa Polosa,
Sapienza University

Nanouschka Myrberg Burström,
Stockholm University

Alexander Jost,
Salzburg University

Stefan Krmnicek,
Tübingen University

The Venue

Salzburg University and the teaching venues are located in the picturesque old town of Salzburg at the foot of the Austrian Alps. The geological environment is rich in metal deposits and historical mines that we will study in the field. Accommodation is arranged at the historical priest seminary guest house in the heart of the city.
